Hye Mi Yun

Education

Master of Science in Biomedical Sciences

- Korea University, College of Medicine (2023.09-2025.08)
- Hematology-Oncology Laboratory under the supervision of Prof. Sang Cheul Oh
- Master's Thesis: 'Repurposing of Pralatrexate for Gastric Cancer Therapy : Induction of p53-Dependent Apoptosis via SMO Inhibition and GLI1 Suppression'
- Total GPA of 4.38 /4.5

Bachelor of Clinical Laboratory Science

- Daegu Haany University, Department of Biomedical Laboratory Science (2019.03-2023.02)
- Total GPA of 4.40 /4.5 (Credits Taken : 155)

Research Experience

Master's Degree (2023.09 – 2025.08)

- Department of Medical Science, Graduate School of Korea University
Hematology-Oncology Laboratory under the supervision of Prof. Sang Cheul Oh

Pre-Master's Research Internship (2023.04 – 2023.08)

- Department of Medical Science, Graduate School of Korea University
Hematology-Oncology Laboratory under the supervision of Prof. Sang Cheul Oh

Research Internship (2022.07 – 2022.08)

- Laboratory of Professor Jae-Jin Song, Department of Medical Science, Yonsei University Graduate School

Undergraduate Researcher (2019.06 – 2023.02)

- Molecular Biology Laboratory, Department of Clinical Laboratory Science, Daegu Haany University

Publications & Presentations

Peer-Reviewed Journals

- “Pralatrexate induces Smoothed degradation via K395 residue targeting to inhibit Hedgehog signaling in gastric cancer”, Cell Death Discovery, (Under Review)
Co-1st Author, Investigation (*In vivo*, *In vitro*, *In silico*), Writing - original draft, Data Curation
- “M. canadensis and its active component salvianolic acid B overcome paclitaxel resistance in gastric cancer via ROS–ER stress signaling”, Cancer Cell International, 26, 2026
Co-Author, Methodology, Data curation
- “Trans cinnamaldehyde enhances TRAIL induced apoptosis through ER stress mediated upregulation of DR5 in colorectal cancer cells”, Scientific Reports, 15, Article number: 38840, 2025.
Co-Author, Validation, Methodology

Conference Presentations

- Repurposing of pralatrexate in gastric cancer: Inducing cell death via SMO inhibition and GLI1 suppression
AACR Annual Meeting 2025, Poster Presentation Co-1st Author
- Regulating tumor-associated macrophage polarization via inhibition of hedgehog signaling for treating colorectal cancer liver metastasis
AACR Annual Meeting 2025, Abstract/Poster Co-author
- Cannabidiol enhances efficacy of atezolizumab via upregulation of PD-L1 expression by cGAS-STING pathway in triple negative breast cancer cells
AACR Annual Meeting 2024, Abstract/Poster Co-author
- Inhibitory effect on TC-1 lungcarcinoma cell proliferation and cell viability of Akebia quininate
KSBMB International Conference 2022, 1st Author Abstract/Poster Presentation
- Inhibitory effect on TC-1 lungcarcinoma cell proliferation and cell viability of Akebia quininate
The Korean Society of Radiolog Annual Confernce 2021, 1st Author Abstract Presentation

Skills

Experimental Skills

- Protein Analysis: Western Blot, Co-IP (Co-Immunoprecipitation)
- Molecular Biology : q-PCR, Cloning, RNA/DNA Extraction
- Cellular Assays: Cell Viability Assay, FACS (Flow Cytometry), Transfection
- Microscopy / Tissue: IF (Immunofluorescence), IHC (Immunohistochemistry)
- Animal Study: Conducting in vivo experiments and managing animal models

Bioinformatics

- In silico Analysis : Molecular Docking Simulation, TCGA Data Analysis
- Analysis Tools : ImageJ, GraphPad Prism

License & Language & Awards

License

Clinical Laboratory Scientist License (2023.03)

Language

TOEIC 930 (2026.04)

Awards

Won the Bronze Award for Best Paper, The Korean Society of Radiolog Annual Conference 2021
